

I-TEC UPDATE January 2020

Proverbs 3:27

Do not withhold good from those who deserve it when it is within your power to act.

This is the verse God used to make a dramatic change in my life way back in 1986. It is just as alive and convicting today as it was then. What about you? Is there something in your life that you can give to make a difference in the lives of Missionaries, Christian doctors and those in Support Roles that are all doing their part in fulfilling the great commission? The I-TEC team, each with their own God given skills, are totally committed to this goal of seeing the Gospel presented to those who have never heard. I want to take this opportunity as we begin 2020 to highlight our active staff and office volunteers who keep us moving forward in this race that God has called us to run. Tom Garber/ President I-TEC

**International Technical
Electric & Construction**

The last part of the Tanzania, Burundi and Uganda trip highlighted last month, ended here at Restoration Gateway in Uganda. We installed a new Lithium battery bank that will now provide power 24/7 to the hospital and connected support housing for Doctors, national support staff and their families. Pictured is 1/2 of the battery bank. This new technology has more stored energy, half the weight and half the physical size as the previous AGM lead batteries.

Kerry Grasser is a retired PA highway engineer and our I-TEC Chairman of the Board. He has been that solid rock ministry partner since we began back in 1988. Kerry does a little bit of everything as office manager and way more than I could list in this update.

Michael Fisher is our Solar Tech, design and installation team leader. Every field installation requires an equal amount of time in research and design.

Nora Villa does our Visa request and shipping documents and works along side of her husband **Miguel** doing project installations as well as construction and shipping projects at the warehouse.

Karen McClain does all of our receipting and shares the bookkeeping responsibilities with Kerry Grasser.

Brian Monte is our Mechanical and Welding team leader. Just like Michael and Miguel, home base is Montoursville PA but meeting the electrical needs of missionaries worldwide is the calling.

Tom Garber
I-TEC President
